This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

INTRODUCTION.

This list is merely an abridgement of the serial entries in the accession book of the museum. The preparation of a classified catalogue would require more time than is now available, but as lists of both kinds are required for ready reference, one of the latter will probably be prepared to accompany this.

When specimens are referred to as belonging to a " collection," it means that the contributor has presented fifty or more pieces.

When specimens have been purchased from reputable local collectors, the names of only the original finders are here given.

Owners of property on which specimens have been found in the course of the Curator's field-work, are credited as donors.

The most generous friend of the museum is Dr. T. W. Beeman, of Perth, through whom, directly and indirectly, many hundreds of valuable specimens have come into our possession, as a result of which primitive life in the country about Lake Rideau is very fully illustrated, perhaps more so than any other district in the Province.

To Messrs. James Dwyer, Jas Rae, H. F. Switzer, Rev. A. G. Morice, Angus Buie, A. McKnight, Jas. Cairnduff, Jas. Dickson, D.L.S., W. G. Long, H. Merriam, Herbert and Theophilus Conner, William and David Melville, George, Robert and Albert Lougheed, C. A See, Cyrenius Bearss, Hugh Nichol, Prof. G. S. Ramsay, Drs. Craig and Collins of Lawrenceburg, Ind., Rev. Dr. Joseph Aunand, New Hebrides, F. F. Payne, Rev. Dr. J. McLean, F. W. Waugh, J. H. Crouse, E. C. Waters, Jas. S. Heath, J. W. Irwin, Dr. T. A. Beeman, George Miller, B. Jackes, W. G. Wright, M. M. Fenwick and Clarence B. Moore, Philadelphia, we are especially indebted for numerous highly valuable specimens.

The names of these and of all other donors appear on the labels.

While the museum is at present fairly representative of the archæology of Ontario, there is yet a necessity for much material. For comparative purposes specimens from other countries are very desirable, but there is no room for curiosities. Objects lacking specific data as to origin and uses are valueless for scientific purposes.

Those who may wish to contribute archæological or ethnological specimens illustrative of life in any conntry, are invited to correspond with the Curator.
